A Great Demonstration in London Against the Irish Coercion Bill-The Largest Meeting Ever Held in the City-Alsace

THUSIABTIC MEETING.

Lorraine Under Martial Lew. LONDON, April 12.—The day appointed for the great Radical demonstration at Hyde Park to protest against the passage of the coercion bill, dawned bright and clear, with a balmy atmosphere and brilliant sunshine. At an early hour large numbers of workingmen put in an appearance at the various places of rendezvous and forming in large processions began wending their way toward Hyde Park.

Vast crowds were soon innrehing from every district of London, headed by hands of music. The leaders came first in carriages, A number of banners with the portraits of Mr. Gladstone, Davitt and Father Kelicr, inscribed with the words, "Justice to Ireland," were carried by the processionists. The greatest enthusiasm prevails. In the park fourteen stands for speakers had been erected along the whole frontage facing the fashionable park lane. The processionists wore green rosetts, cut so as to limitate the shamrock, pinned to the lapels of their coats. The authorities had taken every precau-

of any kind. A large force of police were held in reserve at the police stations nearest the park, to be used in case of an emergency. The meeting was the largest ever held in this city and was a most orderly and entitussiastic gathering. After a number of speeches had been delivered denouncing the enact ment of the coercive measure now before parliament an anti-coercion motion was put simultaneously from the fourteen platform' and unanimously carried with the wildes enthusiasm. Mr. Gladstone watched the procession from a window in Piccadilly and.

tion to prevent an outbreak or disturbance

received an ovation. The Socialists stole a march on the police, and held a meeting in Trafaigar square. Sevoral platforms were erected from which the speakers indulged in some inflammatory speeches. The meeting was very noisy throughout.

Irritation in France.

Paris, April 12.—There continues to be much irritation throughout France over the course of Bismarck in Alsace-Lorraine. Ali members of the French army have been compelled to obtain permission of the German police to visit or live in his province, but now the prohibition is extended to all Frenchmen. This, following upon the heels of the expulsion of M. Antoine, a member of the reichstag from this province, increases the hitter feelings. Alsace-Lorraine practi-cally is under martial law. Four drunken men who shouted "Vive la France" yesterday were arrested and imprisoned.

M. Cable, a deputy in the reichstag from Alsace-Lorraine, who died this week, is to be buried to-morrow. Already the cemetery is patroied by German soldiers to prevent any popular demonstration at the funeral. To-morrow the expulsion of all the French from the territory will be formally carried Do You Want Anything out. French physicians in the employ of the railroads passing through the province have all been ordered to leave.

China's Precious Possession.

LONDON, April 12. -It seems an extraordinary thing to state that at the present moment the Chinese government possesses the fastest torpedo boat in the world. This little vessei, which has just been completed for them by Yarrow & Co., has attained the speed of twenty-four knots an hour. Way, the English admiralty do not possess anything that can approach this speed, it is difficult to say. English vessels, whether large or small, have never seemed to attain their estimated speed.

Lord Lansdowne Afraid.

OTTAWA, Ont., April 12.—There is much excitement here over an official notice to the effect that during the presence of Lord Lansdowne in the senate chamber in opening parllament on the 14th, the gallerles of the senate will be closed. This is the first time in the history of the Dominion that such a step has been taken, the galieries of the senate on such occasions always being open to the public, who are admitted by ticket. A lame excuse is given that it will prevent confusion. The opinion is that his excellency has received letters, the threats contained in which he is afraid will be carried into effect if a crowd is permitted to enter the chamber while he is opening parliament in the floor below. Extra precantion is to be taken to insure his safety in passing between Government house and the senate on the day parliament opens. A strong escort will accompany him going and coming. This, however, is always done.

He said further: "I want to anthe occasion of the visit of the czar, but the report that a fresh attempt had been made upon the czar's life is not fully contained to the world that notwithstanding my name, I will do what I can to see that this land of ours is not further disgraced." #### Plain Talk.

Printers themselves are best qualified to judge of the harmful effects of the pewter-plate system; and the "highest authority" in the land has declared against it. This is the kind of evidence that the BULLETIN is not seeking for.-Republican.

Our neighbor is mistaken. The BULLE-TIN is not seeking any evidence whatever in support of the "plate system," .nor has it ever troubled itself over the matter.

The Bulurin is using the "pewterplates," and more, it intends to use them just as long as it wants to and can make satisfactory arrangements to get them. We say this with all due respect to the International Typographical Union and the printers in general. The editors of the Republican can paste this in their hat, if they want to.

The "plates" enable us to give the lost her rudder. people of Maysville the best paper published here, and that, too, at one cent, just one-half what the Republican would have them pay.

As far as the "harmful effects of the system" is concerned the Republican's tained largely through false pretenses. argument is weak and sllly. Our neighbors would have us abolish the plates that three or four workmen might be given employment. As well might the same argument be used against the laborsaving machinery in all our factories. Abolish such machines, and more hands would be required to do the work. Why doesn't the Republican attack the shoemakers of Maysville? A part of every pair of shoes made here is put up by damage was done in the different parts of machinery elsewhere, and more, the the city. work is just as well done.

Why doesn't the Republican attack the clothing merchants of Maysville, if it is so earnest for the welfare of the workingmen? If all the clothing sold in Maysville was made here how many more workmen would be given employment? The of this city, who have been dissatisfied for same argument used against the "pewterplates" can be used against the shoemakers, the clothing merchants, &c., &c., and we want to see the Republican pitch into them, if it is really and downright qualities with the qualities which comin earnest for the protection of the workingmen.

parent. It seeks to array the working- that is, a man of breeding, and it is also exmen of Maysville against the Bulletin, not with the desire to benefit the working men, but solely and wholly for its own gain. That's the object of the Republican in a few words.

The workingmen of this town have sense enough to know that if it wasn't i · for the "plates" they would have to pay for their newspaper just double what they do now, and realizing this we are willing to leave the matter with them.

For the information of the editors of the Republican, we will add in conclusion that their weak and silly attacks have not injured the BULLETIN in the least. Our sales keep up, and our business is on the increase.

Our neighbors may rave and rant as much as they please, but they are too well known for their blitant efforts to harm any one.

BROTHER T. D. MARCOM, of the Kentucky Democrat, Catlettsburg, will quit the newspaper business, for a while at least. We don't blame him. He has been appointed Inspector of Indian Agencies at a salary of \$2,000 and ex-

#### Who is the Gentleman;

"It is a mistake," says Ouida in the North American Review, "to compare moral pose culture and good breeding." It is a mistake indeed, and yet It la almost as common as speech. Because, for The Republican's scheme is too trans- instance, it is excellent to be a gentleman, | cines and chemicals which they guarantee cellent to be a man of upright character and and kindly disposition, we find these qualities quoted and admired as if they were interchangeable. This absence of discrimination

empties words of all meaning.
"A person," says Oulda, "may be full of kindly courtesles and never utter the shadow of an untruth, and yet be may have red hot hands, a strident voice, an unsupportable manner, dropped aspirates and a horrlbly gross joviality, which makes him the vul-garest of the vulgar." But good breeding by necessity is coming to mean almost anything else the speaker wishes, for the imperative reason that the thing itself is disappeariug; and as for the word gentleman, what does that mean now more than a human biped of the male gender!-New York Home Journal.

#### Salvationists in Ceylon.

Miss Anna Ballard, well known among journalists in New York city as the only female member of the Press club, writes from Colombo, Ceyion, that the Salvation Army has attacked the island, but that the soldiers are regarded there with little favor. The natives haven't the least idea what they are up to, and think that their peculiar antics and goings on are only amusing lilustrations of the pecuiiarlties of the English people.—The Argonaut.

#### Gen. Zachary Taylor.

Walt Whitman remembers meeting Gen. Taylor in New Orleans about forty years ago, and found hlm, in civillan's clothes, "a jovial old, rather stout, plain man, with a wrinkled and dark, yellow-face, and in ways and manners the least of conventional ceremony or etiquette I ever saw; he laughed unrestrainedly at everything comical. He had a great personal resemblance to Fenimore Cooper, the novelist."—Exchange.

#### Natural Gas as a Fuel:

In view of the agitation of the natural gas question here, the following will prove of interest. A correspondent of the Cincinnati Commercial Gazette says: "Natural gas is satisfactory in every way as a fuel. It is clean, safe, cheap and easily controlled. A REPORT THAT IS INTERESTING TO FARMERS. .

The Condition of Wheat on April 1 With the General Average Per Cent. Compared With Previous Years-Sherman

Wants an Extra Session of Congress. WASHINGTON, April 12,-The report of the gricultural department for April relates to the condition of winter grain and comparative healthfulness of farm animals. The returns show that the condition of the soil at the time of seeding was somewhat unfavorable in the states of the Atlantic and gulf coasts, owing to drouth during the late summer and autumn most severe in a portion of Pennsylvania, in Maryland and Virginia and in parts of Texas. The same unfavorable condition prevailed in western Missouri and in Kansas, The continued dry weather made plowing difficult, seeding late, and in localities where it was unbroken when winter set in, germination was slow and the fall growth small."

In the great wheat states of the central west, from Tennessee to Missouri, the seed west, from Tennessee to Missouri, the seed bed for the greater part of the area was in favorable condition, and with local excep-tions the plant made good growth before going into winter quarters. On the Pacific slope the early seeding time was dry, but rains came later and the whole breadth was put in fair condition, though somewhat after the usual data. The covering of snow durthe usual date. The covering of snow during the early portion of the winter was better than usual over a large portion of the wheat area, but there are from many sections complaints of scanty protection during very trying weather since February 15. The month of March was the most severe for a series of years, the temperature being below the average over the whole wheat area east of the Mississippi river, and alternate freezing and thawing wrought serious damage to bare fields, especially in bottom and poorly drained lands. Pennsylvania, Virginia and Ohio suffered severely from this inclemency.

The general average of condition is 88, the same as in 1881, and higher than at the same date in 1883 and 1885, when it was 80 and 73 respectively. The April condition of last year was 92.5, which was still further improved by favorable weather during the month. The average of the principal states are: New York, 97; Pennsylvania, 70; Maryland, 82; Virginia, 79; Texas, 79; Tennessee, 94; Kentucky, 92; Ohio, 79; Michigan, 92; Indiana, 90; Illinois, 92; Missouri, 95; Kansas, 83; California, 92; Oregon, 98. Damage from the Hessian fly is comparatively unnoticed; its presence is mentioned in from one to four counties in New York, Texas, Tennessee, Ohio, Pennsylvania and Michi-

Rye has withstood the unfavorable meteorological conditions better than wheat, the average condition being 93, against 96 at the same date a year ago. The returns of condition of farm animals show a loss of swine amounting to 13.4 per cent., or over five and a half million, and indicates the continued widespread prevalence of hog cholera. The losses of sheep amount to 7 per cent., of cattle 4 3-10 per cent. Losses of cattle are heavjest in the south and in the ranges of the far west, from 5 to 9 per cent., while in the sections where shelter is provided and better care taken, it amounts to only 2 1-2 to 3 per cent. The loss among horses, as usual, is very small, amounting for the whole country to less than seven-tenths of 1 per cent.

The Blue Laws.

WASHINGTON, April 12.—The storm of indignation aroused by the report that the district commissioners had resolved to enforce the absolute law of '43 closing the eating houses, restaurants, news and cigar stands on Sunday had the effect of postponing the at-tempt to carry out its absurd provisions. No effort was made Sunday to prevent the sale of newspapers or cigars, nor were the restau-rant keepers notified to close their places. The chief of police has been ordered however to arrange for the enforcement of the statute to the letter on next Sunday. He will meet with vigorous opposition. The newsdealers in particular will fight the closing of their stands, as the business of Sunday exceeds that of the entire week. A number of prominent lawyers interested themselves in the matter, and the citizens of the district are looking forward to next Sunday with the liveliest anticipation. It is understood that the operation of the statute will be extended to the closing of telegraph offices and the local bureaus of the out-oftown newspapers.

Changed Their Minds.

WASHINGTON, April 12.—A committee called at the White House this morning to called at the White House this morning to invite the president to attend a meeting, to be held at Masonic Temple on Thursday evening, to protest against the passage of a coercion law against Ireland by the English government. Col. Lamont met the delegation and told them that whatever might be the president's feelings or sympathy as a private citizen, there would be manifest impropriety in his taking any action in this matter in his official capacity. The committee reconsidered and decided not to present the incommittee of the considered and decided not to present the incommittee. vitation, and withdrew without seeing the president.

Inspecting the Fast Mail System. Washington, April 12.—Postmaster General Vilas and Superintendent Nash, of the railway mail service, will leave here to-mor-row to Inspect the fast mail service between New York, Chicago and St. Paul, While absent the postmaster general will also consider the advisability of establishing distributing depots for postal cards and stemped envelopes at Chicago, St. Louis and Atlanta,

Work on the Garfield Statue Commenced. Wishington, April 12.-Work was commenced to-day under the direction of Col. Wilson on the erection of the base and pedestal for the Garfield statue to be unveiled next month in the southern circle west of the capital grounds. The pedestal will be in readiness in ten days to receive its sculptured figure. The statue will be ready for shipment about the same date.

Sherman Wants an Extra Session. WASHINGTON, April 12.—Senator Sherman thinks the president should by all means call an extra session of congress to convene as early as October. The senator thinks that by doing this the president would be able to bring about the necessary logislation for the good of the country previous to the immediate approach of the presidential campaign

The New Commissioner of Patents. WASHINGTON, April 12.-Mr. Benton J. Hall, of Iowa, has qualified as commissioner of patents, and will to-morrow assume active charge of the patent office.
